👱 User Model

```php
<?php

namespace App\Models;

use Illuminate\Foundation\Auth\User as Authenticatable;
use Illuminate\Notifications\Notifiable;

class User extends Authenticatable
{
    use Notifiable;

    protected $fillable = [
        'name',
        'email',
        'phone',
        'password',
        'role',
        'status'
    ];

    protected $hidden = [
        'password',
        'remember_token'
    ];

    public function orders()
    {
        return $this->hasMany(Order::class);
    }

    public function reviews()
    {
        return $this->hasMany(Review::class);
    }

    public function carts()
    {
        return $this->hasMany(Cart::class);
    }
}
```

📦 Product Model

```php
<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Model;

class Product extends Model
{
    protected $fillable = [
        'name',
        'slug',
```

```
        'description',
        'price',
        'discount_price',
        'sku',
        'stock_quantity',
        'status',
        'featured'
    ];

    public function images()
    {
        return $this->hasMany(ProductImage::class);
    }

    public function categories()
    {
        return $this->belongsToMany(Category::class, 'product_category');
    }

    public function reviews()
    {
        return $this->hasMany(Review::class);
    }

    public function orderItems()
    {
        return $this->hasMany(OrderItem::class);
    }
}
```

🗂️ Category Model

```
<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Model;

class Category extends Model
{
    protected $fillable = [
        'name',
        'slug',
        'parent_id'
    ];

    public function products()
    {
        return $this->belongsToMany(Product::class, 'product_category');
    }

    public function parent()
    {
        return $this->belongsTo(Category::class, 'parent_id');
    }

    public function children()
    {
```

```
        return $this->hasMany(Category::class, 'parent_id');
    }
}
```

🖼️ ProductImage Model

```
<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Model;

class ProductImage extends Model
{
    protected $fillable = [
        'product_id',
        'image_url',
        'is_primary'
    ];

    public function product()
    {
        return $this->belongsTo(Product::class);
    }
}
```

🛒 Cart Model

```
<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Model;

class Cart extends Model
{
    protected $fillable = [
        'user_id',
        'session_id'
    ];

    public function items()
    {
        return $this->hasMany(CartItem::class);
    }

    public function user()
    {
        return $this->belongsTo(User::class);
    }
}
```

🛍️ CartItem Model

```php
<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Model;

class CartItem extends Model
{
    protected $fillable = [
        'cart_id',
        'product_id',
        'quantity',
        'price'
    ];

    public function cart()
    {
        return $this->belongsTo(Cart::class);
    }

    public function product()
    {
        return $this->belongsTo(Product::class);
    }
}
```

📦 Order Model

```php
<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Model;

class Order extends Model
{
    protected $fillable = [
        'user_id',
        'order_number',
        'total_amount',
        'status',
        'payment_status',
        'payment_method',
        'currency'
    ];

    public function user()
    {
        return $this->belongsTo(User::class);
    }

    public function items()
    {
        return $this->hasMany(OrderItem::class);
```

```
    }

    public function address()
    {
        return $this->hasOne(OrderAddress::class);
    }

    public function payment()
    {
        return $this->hasOne(Payment::class);
    }

    public function tracking()
    {
        return $this->hasMany(OrderTracking::class);
    }
}
```

📦 OrderItem Model

```
<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Model;

class OrderItem extends Model
{
    protected $fillable = [
        'order_id',
        'product_id',
        'quantity',
        'price',
        'total'
    ];

    public function order()
    {
        return $this->belongsTo(Order::class);
    }

    public function product()
    {
        return $this->belongsTo(Product::class);
    }
}
```

📍 OrderAddress Model

```
<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Model;
```

```
class OrderAddress extends Model
{
    protected $fillable = [
        'order_id',
        'full_name',
        'phone',
        'address_line',
        'city',
        'region',
        'country'
    ];

    public function order()
    {
        return $this->belongsTo(Order::class);
    }
}
```

💳 Payment Model

```
<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Model;

class Payment extends Model
{
    protected $fillable = [
        'order_id',
        'transaction_id',
        'provider',
        'phone_number',
        'amount',
        'status',
        'paid_at'
    ];

    protected $casts = [
        'paid_at' => 'datetime'
    ];

    public function order()
    {
        return $this->belongsTo(Order::class);
    }
}
```

🚚 OrderTracking Model

```
<?php

namespace App\Models;
```

```php
use Illuminate\Database\Eloquent\Model;

class OrderTracking extends Model
{
    protected $fillable = [
        'order_id',
        'status',
        'message',
        'updated_by'
    ];

    public function order()
    {
        return $this->belongsTo(Order::class);
    }

    public function updatedBy()
    {
        return $this->belongsTo(User::class, 'updated_by');
    }
}
```

⭐ Review Model

```php
<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Model;

class Review extends Model
{
    protected $fillable = [
        'user_id',
        'product_id',
        'rating',
        'comment'
    ];

    public function user()
    {
        return $this->belongsTo(User::class);
    }

    public function product()
    {
        return $this->belongsTo(Product::class);
    }
}
```
